

Carbon Reduction Plan

Supplier name: RedRock Consulting Ltd

Publication date: Monday 15th November 2021

Commitment to achieving Net Zero

RedRock Consulting Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2019	
Additional Details relating to the Baseline Emissions calculations.	
<i>These baseline emissions reflect very high Scope 3 figures which is primarily down to large amounts of business travel. RedRock typically deliver our teams full time on the customers own office locations.</i>	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	1,279 kgCO ₂ e
Scope 2	13,913 kgCO ₂ e
Scope 3 (Included Sources)	232,011 kgCO ₂ e
Total Emissions	247,203 kgCO₂e

Current Emissions Reporting

Reporting Year: 2021	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	479 kgCO ₂ e
Scope 2	10,533 kgCO ₂ e
Scope 3 (Included Sources)	2,314 kgCO ₂ e
Total Emissions	12,847 kgCO₂e

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 10,000 kgCO₂e by 2026. This is a reduction of 12.2%

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2019 baseline. The carbon emission reduction achieved by these schemes equate to 234,356 kgCO₂e, a 94%ge reduction against the 2019 baseline and these measures will be in effect moving forwards. It is worth noting that the Covid-19 pandemic has dramatically allowed us to almost entirely reduce our business travel – significantly faster than planned.

These initiatives currently include:

- Minimise printing
- Minimise business travel
- Cycle to Work Scheme
- Remote Working where practical
- Switch to low carbon energy provider
- Recycling solution within our office space
- Implement LED lighting

- Prioritise suppliers who also have plans in place to reduce their emissions.
- Restriction of company air conditioning
- Procure new technology with efficient power usage

In the future we hope to implement further measures.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
